

# ***Vision***

***.....A transformed Regiment. A versatile force  
capable of fighting in cyberspace across the  
entire full spectrum of operations***

# ***Why do we need to transform?***

## **Current Structure Designed to:**

- Enable mission command in combined arms maneuver ops
- Provide signal support to battalion level and above
- Provide theater-centric network services
- Support ASCC as the warfighting headquarters
- Enable independent Army expeditionary operations Phases 1-3
- Reach back to Service network in support of Service forces

## **Future Structure Expected to:**

- Enable mission command in wide area security ops and combined arms maneuver ops
- Extend signal support to company level and below
- Support Corps/Div as the warfighting headquarters
- Operate and defend a 24x7 Army single network enterprise
- Provide flexible capabilities through all phases
- Integrate into a converging JTF network in support of CCDR

***Army Operating Concept Creating New Required Capabilities***
